#### Ultrasonic sensor UB200-12GM-U-V1

#### **Features**

- Analogue output 0 V ... 10 V
- Very small unusable area
- Measuring window adjustable
- TEACH-IN input
- Temperature compensation

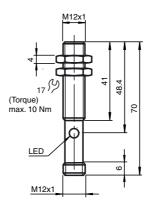

#### Electrical connection

Standard symbol/Connections: (version U)

Core colours in accordance with EN 60947-5-2.

#### **Dimensions**

## Model number

#### Adjusting the evaluation limits

The ultrasonic sensor features an analogue output with two teachable evaluation limits. These are set by applying the supply voltage  $-U_B$  or  $+U_B$  to the TEACH-IN input. The supply voltage must be applied to the TEACH-IN input for at least 1 s. LEDs indicate whether the sensor has recognised the target during the TEACH-IN procedure. The lower evaluation limit A1 is taught with -U<sub>B</sub>, A2 with +U<sub>B</sub>.

Two different output functions can be set:

- 1. Analogue value increases with rising distance to object (rising ramp)
- 2. Analogue value falls with rising distance to object (falling ramp)

#### TEACH-IN rising ramp (A2 > A1)

- Position object at lower evaluation limit
- TEACH-IN lower limit A1 with U<sub>B</sub>
- Position object at upper evaluation limit
- TEACH-IN upper limit A2 with + UB

#### TEACH-IN falling ramp (A1 > A2):

- Position object at lower evaluation limit
- TEACH-IN lower limit A2 with + U<sub>R</sub>
- Position object at upper evaluation limit
- TEACH-IN upper limit A1 with U<sub>B</sub>

#### **Default setting**

Δ1. unusable area

A2. nominal sensing range

Mode of operation: rising ramp

#### **LED Displays**

Displays in dependence on operating mode	Red LED	Yellow LED
TEACH-IN evaluation limit		
Object detected	off	flashes
No object detected	flashes	off
Object uncertain (TEACH-IN invalid)	on	off
Normal mode (evaluation range)	off	on
Fault	on	previous state

#### Installation conditions

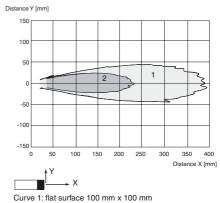

If the sensor is installed at places, where the environment temperature can fall below 0 °C, for the sensors fixation, one of the mounting flanges BF 12, BF 12-F or BF 5-30 must be used. In case of direct mounting of the sensor in a through hole, it has to be fixed at the middle of the housing thread.
